

“The NanoPass Suture Management System allows the surgeon to precisely place sutures in the acetabular labrum to facilitate an anatomic repair with virtually no tissue trauma.”

Shane Nho, M.D., M.S.; Midwest Orthopaedics at Rush, Chicago, IL

NanoPass® Suture Managers

Sometimes, Smaller is Better.

Product Highlights

- 1.5mm diameter tip leaves a small footprint, approx. half the size of a typical suture passer, through the labrum
- Delivers and retrieves up to a #2 suture via a single portal eliminating the need for adjunct tools for suture management
- Mattress, intra-labral or simple stitch may be accommodated depending on labrum condition
- Multiple tip shapes available to address various labral pathologies
- Used in conjunction with the 1.4mm NanoTack Anchors and the 2.4mm CinchLock SS Knotless Anchor to facilitate close approximation to the acetabular rim to allow for anatomic and biomechanic labral restoration

NanoPass Suture Managers

*NanoPass Reach,
Crescent*

NanoPass Reach, Crescent

The arms of the NanoPass Reach, Crescent extend out the end of the device simplifying suture retrieval.

*NanoPass Reach, 45°
Left*

*NanoPass Reach, 45°
Right*

NanoPass Reach, 45° Left and Right

The curve of the NanoPass Reach, 45° allows access to more of the labrum to allow for an anatomic repair. Intra-labral stitches may be accomplished with little to no suture exposure to the joint surfaces.

"In a labral refixation with pincer osteoplasty, the NanoPass Reach, 45° Suture Managers allow the surgeon to minimize the footprint through the chondral-labral junction and, subsequently, the labrum itself without performing a labral takedown."

Andrew B. Wolff, M.D., Hip Arthroscopy and Sports Medicine, Washington Orthopaedics and Sports Medicine, Washington, DC

NanoPass Ordering Information

Description	Catalog No.
NanoPass Suture Manager Reach, Crescent	CAT02298
NanoPass Suture Manager Reach, 45° Left	CAT01355
NanoPass Suture Manager Reach, 45° Right	CAT01356

NanoPass's small puncture footprint provides minimal labrum disruption.
